

BAMBINO THE MAGICAL BABY TOOTH

It's not a diamond but for mommy it's as precious as it can be. It's the baby tooth that, once fallen, becomes a jewel.

Reviving an ancient tradition, an Italian firm introduces *Bambino, the magical baby tooth*: gold or silver plated baby teeth, transformed into precious pendants. (www.preciousbabytooth.com)

*Gold plated baby tooth.
From €199*

*Silver plated baby tooth.
From €169*

*Gold plated baby tooth
with diamond. From €299*

BAMBINO THE MAGICAL BABY TOOTH

On the red carpet Susan Sarandon has been seen wearing a charm bracelet trimmed with her three children's baby teeth. Madonna and Demi Moore proudly show their single milk tooth hanging from a thin, precious chain.

When a baby tooth comes out, the family goes through a rite of passage. A small crisis which may be transformed into a keepsake for life. How? Turning the baby tooth into a precious pendant.

The idea comes from an Italian jewellery company based in Tuscany which has recently introduced *Bambino, the magical baby tooth*. *Bambino* is a pendant crafted using a combination of modern scientific techniques and traditional Italian jewellery craftsmanship and may be worn either with a chain or a bracelet. Gold and silver versions are available and both of them may be further enriched with a small diamond.

In addition to the original baby tooth, an unlimited number of replicas may be ordered to create more complex designs (a pair of earrings, cufflinks, a charm bracelet, a brooch...) or to give them as a gift to grandmothers, aunts, godmothers or anybody else who loves your child.
