

## F. A. Q.

### What is “Bambino - the magical baby tooth”?

It's a baby tooth which we will transform for you into a keepsake for life.

### What is a replica?

A replica is an exact duplicate of the original baby tooth. To share happy emotions with everyone who loves your child or to create more complex and beautiful designs.

### Which materials are used?

The scientific process uses the same nanofilled resin composite employed in modern dentistry and to create the jewel the tooth is plated with pure metal (1000‰). Replicas are created from the most precious alloys used in Italian high-end jewellery: silver is 925‰ pure metal and gold is 18 Kt (750‰).

### How can I place an order?

Go to [www.preciousbabytooth.com](http://www.preciousbabytooth.com) and you will find all instructions and information.

### Can any tooth be customized?

Our craftsmen can satisfy any requirement or work on suggested designs. Contact us specifying your requests and we'll send you our suggested designs with relevant cost estimates.

## *The baby tooth rhyme*

Please dear fairy  
tonight as I sleep,  
leave me a coin  
my tooth you can keep.

But give it to daddy  
who'll make it a joy  
that mommy can wear  
as a beautiful toy.

TREASURE

When a baby tooth comes out, the family goes through a rite of passage. A small crisis which may be transformed into a keepsake for life. How? Turning the baby tooth into a precious pendant.

Mica Auri, an Italian jewellery company based in Tuscany, introduces *Bambino, the magical baby tooth*. *Bambino* is a pendant crafted using a combination of modern scientific techniques and traditional Italian jeweler's craftsmanship which may be worn either with a chain or a bracelet.

Gold and silver versions are available and both of them may be further enriched with a small diamond.

In addition to the original baby tooth, an unlimited number of replicas may be ordered to create more complex designs (a pair of earrings, a charm bracelet, a brooch) or to give them as a gift to grandmothers, aunts or godmothers.
